DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-14, drawn to a method of preparing a polymer blend composition using a “curing composition ... (that) comprises an initiator ... and crosslinking agent”, classified in class 525, subclasses 199, 200 and 240.
- II. Claims 15-23, drawn to a method of preparing a polymer blend composition using a peroxide masterbatch and recited conditions, classified in class 525, subclasses 199 and 200.
- III. Claims 24-33, drawn to a molded article, classified in class 525, subclasses 199, 200 and 240.
- IV. Claims 34-38, drawn to a method of preparing a polymer blend composition using two separate blend constituents of recited characteristics, classified in class 525, subclasses 199 and 200.
- V. Claims 39-49, drawn to a method of preparing a peroxide cured dynamic vulcanizate, classified in class 525, subclasses 199 and 200.

The inventions are distinct, each from the other because of the following reasons:

Inventions of Groups I, II, IV and V are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions Each Group is drawn to a

process for producing blends that are different in scope and would have different effects and characteristics.

Inventions of Groups I, II, IV and V and of Group III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions of Groups I, II, IV and V are drawn to methods, but not to methods of producing a molded article as recited in the Group III claims.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Due to the complexity of the restriction, applicant's counsel was not contacted telephonically to request an oral election to the requirement.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
